### Book Synopsis

Here's How: Balanced Intervention for Children with Autism Spectrum Disorder is a timely resource for speech-language pathologists working with children on the autism spectrum as well as graduate students preparing to work with this demographic. The authors outline a clear explanation of autism spectrum disorder and how it affects communication, socialization, behavior, and learning. Furthermore, they review evidence-based practices and provide tools for instructional strategies. This book doesn't set out to provide a recipe for therapy; rather, guidelines to follow and individualize for each patient. The video clips on the accompanying DVD allow for multimedia, multisensory learning and provide models for clinicians. The DVD also includes practical applications for the clinical setting derived from research and experience.
