Book Synopsis

Thomas Paine made a strong argument in his pamphlet, *Common Sense*, for people in the Thirteen Colonies to gain independence from England in 1775-1776. This pamphlet takes a similar approach, also based on simple facts, plain arguments, and common sense.

Now, 241 years later, the subject is different but parallel to his goal—to have the American people gain freedom from corporate interests in our medical-industrial complex that take their exorbitant profits on the backs of sick Americans, their families, and taxpayers.

Readers will find the reasons for today's health care crisis, lessons we can learn from previous reform failures, and a comparison of three financing alternatives: (1) the Affordable Care Act, (2) the GOP's American Health Care Act (AHCA), and (3) national health insurance under Medicare for All. The latter is analyzed as the only way to achieve sustainable universal coverage to comprehensive health care, with a description of how it will work.

We can achieve national health insurance given political will and a grassroots movement around the country energized by the majority of Americans who are losing out to corporate profiteers.
