Book Synopsis

Gasonomics is written for anesthesia residents and newly graduated anesthesiologists. The book was created to de-mystify the business side of anesthesiology by Richard O'Leary, M.D., a California anesthesiologist with almost 20 years experience in private practice. Gasonomics discusses how to locate an anesthesia position even if it isn't advertised, what questions to ask during your anesthesia interview, how to evaluate an employment contract/offer and how to keep your new anesthesia position.
